

WW 300 Series

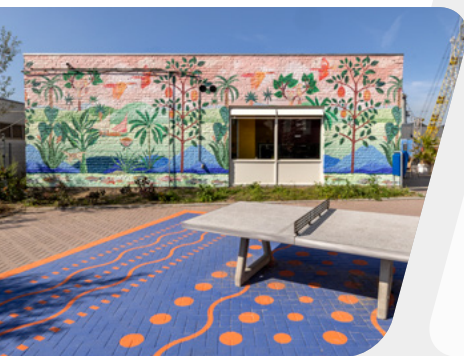

Designs come alive!

Track record counts, and the WW 300 Series has now been popular across the graphics market for 15 years, coping with extreme applications. It remains the product of choice because of its outstanding adhesion on the most challenging surfaces - such as concrete and textured walls. This is the film that can stick reliably to extremely difficult walls, and look great when in place.

Now the WW 300 Series is even more versatile, with the addition of a new PVC-free option, WW 319 PU Gloss. You can expand your possibilities with this PVC-free innovation, which redefines flexibility and performance. WW 319 PU Gloss not only embraces sustainability, but also offers a one-of-a-kind soft face film formulation tailored to textured and brick walls. It is an outstanding choice whenever you're facing the many challenges of real-world walls - many different outdoor surfaces, including stone, bricks and paint, and also different weather conditions.

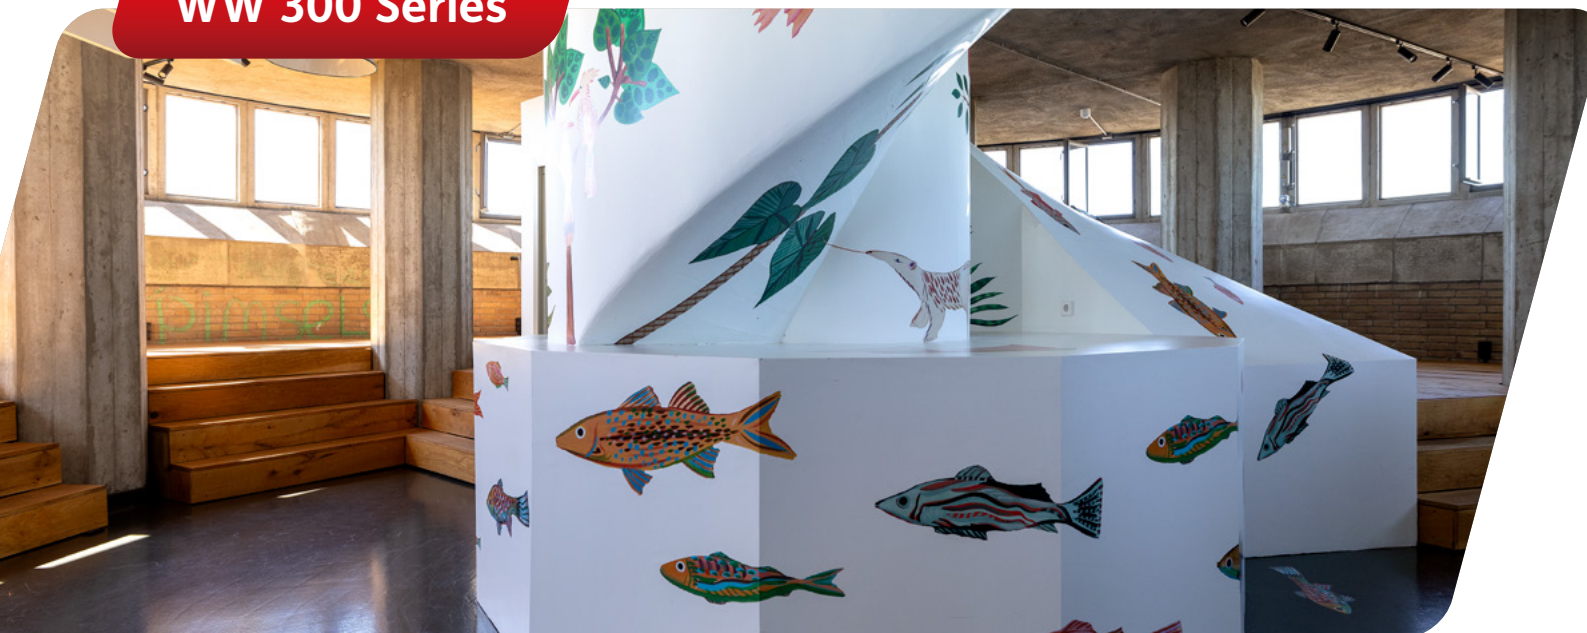

The WW 300 Series can be paired with several Mactac laminating films, for different finishes and applications ranging from flooring to anti-graffiti solutions.

Advantages

- High-tack adhesive for strong adhesion on many different walls
- Great opacity from a grey adhesive
- Excellent printability on all main platforms
- Available in gloss and in matt finishes
- **New!** 319 PU Gloss PVC-free solution - a unique soft face film formulation for textured and brick walls

WW 300 Series

Applications

- Medium-term applications
- Indoor and outdoor decoration
- Vertical and horizontal flat surfaces
- Difficult wall substrates
- **New!** Irregular surfaces such as brick, concrete and textured walls with WW 319 PU Gloss PVC-free
